DAILY TRACKING SHEET

END-OF-DAY REPORT TEMPLATE

QUICK REFERENCE

HealthRoute Medical Courier

Sep 11-14 Cold Call Execution Manual

QUICK START — TOMORROW 8 AM

Calendar alarm fires at 8:00 AM Sep 11.

1. Open this PDF on your phone or tablet
2. Open `/calls/LT-005-FINAL-CALL-LIST.csv` (30 prospects)
3. Open a notepad or Google Sheet to log outcomes
4. Have the discovery questions ready
5. Make 10-15 calls
6. Update outcomes: Interested / Objection / Voicemail / Declined
7. Move to the next prospect

Revenue Target: 3-5 medical labs agree to pilot contract ($\$1\text{K/month} \times 3-5 = \$3-5\text{K}$ by Sep 14)

Success Metric: 80%+ of 30 prospects get discovery questions asked

ICP — WHO WE'RE CALLING

Ideal Customer Profile: Medical Labs/Facilities

- Clinical labs
- Diagnostic centers
- Hospital lab departments
- 50-500 employees (mid-market)
- Multiple locations (increases specimen volume)
- Current courier pain or no dedicated courier

Pain Signals in Your 30 Prospects:

- Specimen delays affecting patient care
 - No dedicated medical courier (using generic services)
 - HIPAA compliance concerns
 - Temperature control issues
 - Losing referrals to faster competitors
 - Current courier doesn't prioritize STAT orders
-

MESSAGING — WHAT TO SAY

60-Second Call Formula

Opener (15 sec):

"Hi [name], this is [you] with HealthRoute Medical Courier. I'm calling because we help medical labs move specimens fast and safely—HIPAA-compliant, real-time tracking, insurance-backed. Do you have 2 minutes?"

Value Proposition (30 sec):

"Most labs use generic couriers or share rides that delay results. We specialize in specimen logistics: HIPAA-compliant, real-time GPS tracking, climate-controlled transport, and full liability insurance. Faster turnaround = happier patients = more referrals."

Call to Action (15 sec):

"Let me ask you a few quick questions about your current volume and geography. Then I can send you a customized quote. How many specimens daily on average?"

DISCOVERY QUESTIONS (Ask in Order)

Ask naturally. Don't read robotically.

1. **"How many specimens do you process per day on average?"** → Determines service level + pricing
 2. **"What's your geographic service area?"** → Route complexity + cost
 3. **"Are you currently using a generic courier or managing delivery in-house?"** → Establishes current solution + switching objection
 4. **"How often do you experience delays?"** → Quantifies pain + urgency
 5. **"Have you had any compliance audits recently?"** → Triggers compliance pain + liability awareness
 6. **"What's your biggest specimen-related complaint from doctors?"** → Uncovers hidden pain + builds urgency
-

OBJECTION HANDLERS — THE 5 YOU’LL HEAR

OBJECTION #1: “WE USE UPS / GENERIC COURIER” (60% LIKELIHOOD)

Root Fear: Already have solution, switching costs, unknown risk

Your Response:

”Many labs do. The issue: generic couriers don’t understand specimen handling. They delay, they don’t maintain temp control, and they can’t prioritize STAT orders. HealthRoute specializes in medical specimens. How often do you have delayed results with your current courier?”

Win Condition: They admit to at least 1-2 delayed specimens/month

OBJECTION #2: “HIPAA COMPLIANCE IS TOO MUCH HASSLE” (40% LIKELIHOOD)

Root Fear: Regulatory burden, compliance risk, IT complexity

Your Response:

”That’s exactly why we exist. We handle all HIPAA documentation, security training, audit trails—you just use the app. Our carriers are HIPAA-certified and insured. You’re more protected with us than DIY.”

Win Condition: They agree HIPAA is a real concern + our solution reduces risk

OBJECTION #3: “COST IS A CONCERN” (50% LIKELIHOOD)

Root Fear: Budget pressure, ROI unclear, price seems high

Your Response:

"I get it. But think about it this way: one lost patient due to delayed results costs you \$5K in referral value. One HIPAA violation can cost \$100K+. Our service is insurance against that. What's your typical specimen volume?"

Reframe: Cost → Risk protection + Revenue opportunity (faster = more referrals)

Win Condition: They admit cost is manageable vs. risk + referral value

OBJECTION #4: "WE DON'T HAVE THAT MANY SPECIMENS" (30% LIKELIHOOD)

Root Fear: Volume too low, cost not justified for their size

Your Response:

"Even small labs benefit—we handle fractional service. You only pay for what you use. Plus, you can scale up as you grow. Let me send a quote based on your actual volume."

Win Condition: They acknowledge speed matters + agree to see pricing

OBJECTION #5: "LET ME CHECK WITH THE LAB DIRECTOR" (70% LIKELIHOOD)

Root Fear: Not the decision maker, need internal alignment

Your Response:

"Perfect. Can you tell me your typical volume and who the director is? I'll send a one-page overview to both of you. That way when you talk, you'll both have the same info."

Win Condition: Get name + email of decision maker + permission to send materials

CALL FLOW CHECKLIST

For each prospect, hit these marks:

- ☐ Introduced yourself + got permission for 2 minutes
 - ☐ Delivered value prop without pushback (or handled objection)
 - ☐ Asked 3+ discovery questions + got answers
 - ☐ Established pain (delays, compliance, or referrals)
 - ☐ Next step agreed: "I'll send a quote by [date]"
 - ☐ Got decision-maker name + email (if not talking to them)
 - ☐ Logged outcome: **Interested / Objection / Voicemail / Declined**
-

EXPECTED OUTCOMES (30 Prospects)

Outcome	Frequency	Count	Next Step
Interested	20-30%	6-9 labs	Send customized quote within 24 hrs
Objection	30-40%	9-12 labs	Handle objection + requalify
Voicemail	20-30%	6-9 labs	Leave message: "Calling back Sep 12"
Declined	10-20%	3-6 labs	Note reason, don't push

Target for Sep 11-14: 6-9 labs interested → 3-5 labs agree to pilot contract

30 PROSPECT CALL BRIEFINGS

Use these pre-call prep cards. Print or load on phone.

Prospect #1

Company: ABC Diagnostic Laboratory

Contact: Jane Smith, Laboratory Operations Manager

Location: Charlotte, NC

Why Calling: Multiple laboratory locations suggest recurring specimen transportation needs between facilities.

Hypothesis: Using scheduled transportation between locations, could need backup/overflow capacity.

Call Objective: Determine current courier arrangement + identify one recurring route opportunity.

Opening: “Hi Jane, this is [NAME] with HealthRoute. We work with healthcare organizations on time-sensitive medical transportation. I’m reaching out because I understand your organization operates multiple laboratory locations. I wanted to ask how you’re currently handling specimen transportation between those locations.”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We already have a courier.”

Response: “Absolutely. I’m not necessarily calling to replace them. We also work as backup or overflow when your primary provider isn’t available. Where do you currently have coverage gaps?”

Desired Outcome: Route info + schedule discovery meeting

Next Step: Send route questionnaire + call Tuesday 10 AM

Prospect #2

Company: MediCare Plus Laboratories

Contact: Robert Chen, Lab Manager

Location: Greensboro, NC

Why Calling: Hospital system with 3+ locations likely needs recurring specimen transport between facilities.

Hypothesis: Managing own transportation or using unreliable third-party. Time-sensitive specimens suggest pain.

Call Objective: Qualify recurring route volume + STAT requirements.

Opening: “Hi Robert, quick question—how are you currently handling specimen transport between your lab locations?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “Cost is a concern.”

Response: “I understand. One HIPAA violation can cost \$100K+. Our service is insurance against that. What’s your typical volume?”

Desired Outcome: Cost-aware but interested in risk mitigation

Next Step: Send cost-benefit analysis

Prospect #3

Company: Premier Diagnostic Centers

Contact: Linda Vasquez, Operations Director

Location: Raleigh, NC

Why Calling: Multi-location diagnostic center requires coordinated specimen transport with tight turnaround.

Hypothesis: High specimen volume, STAT orders, possible compliance concerns.

Call Objective: Identify STAT requirement + volume.

Opening: “Linda, I’m reaching out to diagnostic centers in the Raleigh area. Can I ask—do you have STAT specimen requirements?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We’re happy with our current provider.”

Response: “Most labs say that until they experience one delayed STAT result. How often do you get same-day results?”

Desired Outcome: Admit pain exists

Next Step: Schedule 15-min facility tour

Prospect #4

Company: Pathology Partners LLC

Contact: Michael Rodriguez, Director

Location: Durham, NC

Why Calling: Reference laboratory needs reliable specimen intake from multiple sources.

Hypothesis: High specimen volume from physician offices + hospitals. Temperature control critical.

Call Objective: Establish volume + source locations.

Opening: “Michael, how many physician offices and hospitals are you receiving specimens from daily?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “Let me check with the lab director.”

Response: “Perfect. Can you give me the director’s name? I’ll send a one-page overview to both of you.”

Desired Outcome: Get decision maker contact

Next Step: Email overview to both parties

Prospect #5

Company: TriCity Clinical Laboratory

Contact: Sarah Johnson, Procurement Manager

Location: Winston-Salem, NC

Why Calling: Multi-city operations require coordinated logistics.

Hypothesis: Current courier doesn't cover all locations. May have SLAs.

Call Objective: Understand geographic coverage + pain points.

Opening: "Sarah, I work with clinical labs that cover multiple cities. How are you currently managing specimen transport between your locations?"

Discovery Questions:

1. How many specimens daily on average?
2. What's your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: "Your price is too high."

Response: "What does one delayed result cost you in referral value? That's typically \$5K+. We're insurance against that."

Desired Outcome: Cost-benefit acknowledged

Next Step: Request current logistics spend for comparison

Prospect #6

Company: Capital Region Medical Labs

Contact: Dr. James Wilson, Laboratory Director

Location: Raleigh, NC

Why Calling: Hospital-affiliated lab. Decision maker title suggests authority.

Hypothesis: HIPAA-sensitive. May have regulatory requirements we can help with.

Call Objective: Determine HIPAA compliance concerns + volume.

Opening: “Dr. Wilson, quick question—does your lab have HIPAA-certified courier service?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “HIPAA compliance is too much hassle.”

Response: “That’s exactly why we exist. We handle all HIPAA documentation + training. You’re more protected with us than DIY.”

Desired Outcome: Accept compliance responsibility shift

Next Step: Send HIPAA compliance checklist

Prospect #7

Company: Quantum Diagnostics

Contact: Amanda Foster, Operations Manager

Location: Chapel Hill, NC

Why Calling: University-affiliated diagnostic center. May have research specimens = complex handling.

Hypothesis: Research specimens require special handling + chain-of-custody.

Call Objective: Discover specimen types + handling requirements.

Opening: “Amanda, do you handle research specimens along with routine diagnostics?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We handle transportation internally.”

Response: “How’s that working when you get high-volume STAT orders? Can your internal team scale that?”

Desired Outcome: Acknowledge internal team limitations

Next Step: Propose hybrid model (core routes internal, overflow HealthRoute)

Prospect #8

Company: Innovative Lab Solutions

Contact: George Martinez, Supply Chain Manager

Location: Greensboro, NC

Why Calling: Supply chain title suggests logistics responsibility + authority.

Hypothesis: Already thinking about logistics optimization.

Call Objective: Understand current courier strategy + pain points.

Opening: “George, I work with labs that are optimizing specimen transport. Can I ask—who currently handles your courier logistics?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We’re not interested.”

Response: “Understood. One thing I’ve found: most labs don’t realize their current courier is losing them \$3-5K/month in delayed STAT results. Would a 15-minute assessment be worth that?”

Desired Outcome: Agree to assessment

Next Step: Schedule 15-minute logistics review

Prospect #9

Company: Heritage Medical Center Labs

Contact: Patricia Young, Lab Manager

Location: High Point, NC

Why Calling: Hospital-affiliated. Title suggests operational responsibility.

Hypothesis: May have compliance audit coming up. HIPAA concern likely.

Call Objective: Establish HIPAA compliance pain + volume.

Opening: “Patricia, when was your last HIPAA compliance audit?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We’re under contract.”

Response: “That’s fine. When does your agreement expire? I can follow up then, or we can explore a test route in the meantime.”

Desired Outcome: Get contract renewal date

Next Step: Calendar reminder for contract renewal

Prospect #10

Company: Precision Pathology Partners

Contact: Kevin Thompson, Operations Director

Location: Fayetteville, NC

Why Calling: Multi-partner structure suggests coordination challenges.

Hypothesis: Complex multi-location logistics. Pain in coordinating courier.

Call Objective: Understand coordination pain + locations.

Opening: “Kevin, with multiple partners, how are you coordinating specimen transport?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We already have a courier.”

Response: “How’s coordination working when different offices have different pickup times? Are you optimizing for their schedule or yours?”

Desired Outcome: Acknowledge coordination gaps

Next Step: Propose logistics optimization assessment

Prospect #11

Company: Blue Ridge Diagnostics

Contact: Susan Clark, Lab Director

Location: Asheville, NC

Why Calling: Mountain region. May have geographic challenges with courier.

Hypothesis: Terrain + distance create delivery challenges.

Call Objective: Understand geographic routing + timing.

Opening: “Susan, how do you handle specimen pickup from remote clinics?”

Discovery Questions:

1. How many specimens daily on average?

2. What's your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: "Cost is a concern."

Response: "Rural routes are complex. We handle them routinely. One delayed referral is worth \$5K+. Worth a conversation?"

Desired Outcome: Interest in route optimization

Next Step: Propose rural route assessment

Prospect #12

Company: Coastal Medical Laboratories

Contact: Frank Martinez, Procurement

Location: Wilmington, NC

Why Calling: Coastal location. Tourism + seasonal population changes.

Hypothesis: Seasonal volume fluctuations. Need flexible courier.

Call Objective: Understand volume variability + current solution.

Opening: "Frank, with seasonal population changes, how do you adjust courier capacity?"

Discovery Questions:

1. How many specimens daily on average?
2. What's your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?

5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We’re happy with our current provider.”

Response: “Most labs are until STAT season hits. How do you handle peak demand?”

Desired Outcome: Acknowledge seasonal pain

Next Step: Propose peak-season pilot

Prospect #13

Company: Triangle Reference Lab

Contact: Jennifer Lee, Operations Manager

Location: Raleigh, NC

Why Calling: Reference lab = high volume from many sources.

Hypothesis: Complex multi-source specimen intake. High STAT volume likely.

Call Objective: Establish volume + STAT %.

Opening: “Jennifer, how much of your daily volume is STAT requests?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We don’t need a courier.”

Response: “You’re receiving specimens from 20+ physician offices daily. How are you getting 100% on-time?”

Desired Outcome: Admit STAT challenges

Next Step: Schedule volume assessment

Prospect #14

Company: Piedmont Clinical Labs

Contact: David Brown, Lab Manager

Location: Greensboro, NC

Why Calling: “Piedmont” suggests multi-facility network.

Hypothesis: Network requires coordinated logistics.

Call Objective: Understand network structure + routing.

Opening: “David, how many facilities does your Piedmont network span?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “Let me check with the lab director.”

Response: “Perfect. Can you give me the director’s contact? I’ll send an overview to both of you.”

Desired Outcome: Get decision maker

Next Step: Email to director

Prospect #15

Company: Sunrise Medical Laboratory

Contact: Michelle Anderson, Director

Location: Winston-Salem, NC

Why Calling: “Sunrise” + director title = decision authority.

Hypothesis: May be considering logistics changes.

Call Objective: Discover current courier satisfaction + future plans.

Opening: “Michelle, are you currently looking at courier options or committed to your current provider?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “Your price is too high.”

Response: “What does your current courier cost annually? Let’s compare total cost of ownership, not just per-delivery rate.”

Desired Outcome: Open to cost comparison

Next Step: Send cost comparison template

Prospect #16

Company: Velocity Labs

Contact: Thomas Wilson, Operations

Location: Durham, NC

Why Calling: “Velocity” suggests speed focus. May value fast turnaround.

Hypothesis: Already thinking about delivery speed as differentiator.

Call Objective: Understand speed requirements + pain.

Opening: “Thomas, what’s your fastest specimen turnaround time currently?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We already have a courier.”

Response: “Understood. Do they guarantee STAT turnaround? Or do you get occasional delays that cost referrals?”

Desired Outcome: Admit delays happen

Next Step: Propose SLA comparison

Prospect #17

Company: CarePoint Diagnostics

Contact: Rachel Green, Manager

Location: Chapel Hill, NC

Why Calling: “Care” + diagnostics = patient-focused. May value service quality.

Hypothesis: Patient outcomes matter. May respond to referral-growth argument.

Call Objective: Connect courier speed to patient care outcomes.

Opening: “Rachel, when specimen delays happen, how does that affect patient care?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “HIPAA compliance is too much hassle.”

Response: “Patient data security is our highest priority. We handle all HIPAA requirements—you focus on care.”

Desired Outcome: Shift compliance burden acceptance

Next Step: Send HIPAA readiness checklist

Prospect #18

Company: Nexus Medical Labs

Contact: Brian Kelly, Supply Chain

Location: Fayetteville, NC

Why Calling: “Nexus” + supply chain = logistics sophistication.

Hypothesis: Already thinking strategically about supply chain.

Call Objective: Understand supply chain strategy + courier role.

Opening: “Brian, in your supply chain strategy, how is specimen courier logistics currently handled?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We’re not interested.”

Response: “I get it. But most labs don’t optimize courier until they lose a major referral. Would a 10-minute supply chain audit be worth preventing that?”

Desired Outcome: Interest in audit

Next Step: Schedule supply chain audit

Prospect #19

Company: MetaLabs

Contact: Amy Foster, Lab Operations

Location: Raleigh, NC

Why Calling: Lab operations title = day-to-day logistics owner.

Hypothesis: Feels operational pain daily.

Call Objective: Surface daily frustrations + pain.

Opening: “Amy, what’s the biggest headache you face with current specimen logistics?”

Discovery Questions:

1. How many specimens daily on average?
2. What's your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: "Call me back later."

Response: "Absolutely. When's best? I want to catch you when you have 15 minutes."

Desired Outcome: Scheduled call back

Next Step: Call back on scheduled time

Prospect #20

Company: Benchmark Diagnostics

Contact: David Sousa, Director of Operations

Location: High Point, NC

Why Calling: Director title = P&L responsibility + authority.

Hypothesis: Focused on operational efficiency + cost.

Call Objective: Frame as operational efficiency opportunity.

Opening: "David, I work with diagnostic centers optimizing their operational costs. Can I ask—what % of your budget goes to logistics?"

Discovery Questions:

1. How many specimens daily on average?
2. What's your geographic service area?

3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We already have a courier.”

Response: “I’m not here to replace them. Most labs find they can optimize costs by 15-20% without sacrificing service. Interested in an assessment?”

Desired Outcome: Open to cost assessment

Next Step: Send cost audit invitation

Prospect #21

Company: Summit Labs

Contact: Victoria Chen, Manager

Location: Winston-Salem, NC

Why Calling: “Summit” = aspirational. May value service excellence.

Hypothesis: Competitive mindset. May want best courier.

Call Objective: Frame as competitive advantage.

Opening: “Victoria, do you see courier reliability as a competitive advantage?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We’re happy with our current provider.”

Response: “Most are, until they see a competitor win referrals due to faster turnaround. How often does that happen to you?”

Desired Outcome: Admit competitive pressure

Next Step: Propose competitive advantage assessment

Prospect #22

Company: Harbor Diagnostics

Contact: Jennifer Walsh, Operations Director

Location: Wilmington, NC

Why Calling: Harbor + operations = logistics sensibility.

Hypothesis: Think in terms of logistics/throughput.

Call Objective: Understand logistics efficiency concerns.

Opening: “Jennifer, how are you currently measuring courier performance?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “Let me check with the lab director.”

Response: “Perfect. Can you grab the director’s name? I’ll send a performance metrics overview to both of you.”

Desired Outcome: Get decision maker

Next Step: Send performance metrics

Prospect #23

Company: ProPoint Laboratory

Contact: Christopher Davis, Lab Director

Location: Greensboro, NC

Why Calling: Director + lab = operational authority + HIPAA responsibility.

Hypothesis: Personally liable for compliance.

Call Objective: Establish HIPAA concern + compliance risk.

Opening: “Christopher, with HIPAA audit requirements, how do you ensure courier compliance?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “HIPAA compliance is too much hassle.”

Response: “We handle all compliance requirements. You reduce personal liability. Worth 15 minutes to discuss?”

Desired Outcome: Accept liability reduction value

Next Step: Schedule HIPAA compliance call

Prospect #24

Company: Infinity Diagnostics

Contact: Nicole Rodriguez, Operations

Location: Fayetteville, NC

Why Calling: Operations title + diagnostics = logistics responsibility.

Hypothesis: Feels efficiency pain daily.

Call Objective: Surface efficiency frustrations.

Opening: “Nicole, what would ideal specimen logistics look like for your operation?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “Cost is a concern.”

Response: “Most labs save money after reducing delayed referrals. One STAT miss = \$5K+. Worth an assessment?”

Desired Outcome: Open to financial assessment

Next Step: Send financial impact calculator

Prospect #25

Company: CoreLab Services

Contact: Mark Johnson, Manager

Location: Raleigh, NC

Why Calling: “Core” + services = essential infrastructure. May value reliability.

Hypothesis: Reliability matters more than price.

Call Objective: Establish reliability pain.

Opening: “Mark, how reliable is your current courier in delivering STAT specimens on time?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We already have a courier.”

Response: “Understood. What’s your on-time delivery rate? We guarantee 98%+.”

Desired Outcome: Compare reliability metrics

Next Step: Send reliability SLA

Prospect #26

Company: Unity Medical Laboratory

Contact: Lisa Patterson, Director

Location: Chapel Hill, NC

Why Calling: “Unity” = collaborative. May value partnerships.

Hypothesis: May see HealthRoute as partner, not vendor.

Call Objective: Frame as partnership opportunity.

Opening: “Lisa, are you open to exploring partnership opportunities with specialized courier services?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “Let me check with the lab director.”

Response: “Great. I’d like to speak with both of you about a partnership. Can you connect us?”

Desired Outcome: Facilitate director intro

Next Step: Schedule director meeting

Prospect #27

Company: Quest Diagnostics (Regional)

Contact: Robert Taylor, Operations Manager

Location: Durham, NC

Why Calling: Quest regional = may have local optimization opportunities.

Hypothesis: Corporate may not optimize local operations.

Call Objective: Understand local courier challenges.

Opening: “Robert, does the regional operation have flexibility in courier selection?”

Discovery Questions:

1. How many specimens daily on average?
2. What's your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: "We use corporate courier."

Response: "Understood. Does corporate courier meet your local STAT requirements? Or are there optimization opportunities locally?"

Desired Outcome: Identify local gaps

Next Step: Send local optimization proposal

Prospect #28

Company: Spectrum Laboratories

Contact: Angela Moore, Supply Chain Manager

Location: High Point, NC

Why Calling: Supply chain + manager = logistics ownership.

Hypothesis: Actively optimizing logistics.

Call Objective: Understand optimization initiatives.

Opening: "Angela, what logistics optimization initiatives are you working on?"

Discovery Questions:

1. How many specimens daily on average?
2. What's your geographic service area?

3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We’re not interested.”

Response: “I get it. But most labs don’t realize courier is a \$50-100K/year optimization opportunity. Worth a 15-minute assessment?”

Desired Outcome: Interest in assessment

Next Step: Schedule logistics assessment

Prospect #29

Company: Titan Medical Center Labs

Contact: Kevin Walsh, Lab Director

Location: Winston-Salem, NC

Why Calling: “Titan” + director = authority + confidence.

Hypothesis: May be ready to make decisions quickly.

Call Objective: Establish urgency + decision timeline.

Opening: “Kevin, if you found a better courier, how quickly could you make a switch?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We’re under contract.”

Response: “When’s the renewal? I can support you with a transition plan when the time comes.”

Desired Outcome: Get contract renewal date + support commitment

Next Step: Calendar alert for renewal date

Prospect #30

Company: Vanguard Diagnostics

Contact: Patricia Stewart, Operations

Location: Asheville, NC

Why Calling: “Vanguard” + operations = forward-thinking.

Hypothesis: May be early adopter.

Call Objective: Establish visionary thinking + opportunity.

Opening: “Patricia, I work with diagnostic centers that are rethinking their logistics. Are you open to exploring new approaches?”

Discovery Questions:

1. How many specimens daily on average?
2. What’s your geographic service area?
3. Using generic courier or in-house?
4. How often do you experience delays?
5. Any compliance audits recently?
6. Biggest specimen complaint from doctors?

Likely Objection: “We already have a courier.”

Response: “Most do. But visionary labs are seeing courier as a competitive advantage, not just an expense. Ready to explore?”

Desired Outcome: Open to innovation conversation

Next Step: Schedule innovation strategy call

DAILY TRACKING SHEET

Date: Sep 11, 2026

#	Company	Contact	Outcome	Notes	Decision Maker	Follow-Up

Revenue Projection:

Key Insights:

1. What worked today?
2. What failed?
3. Which prospects should be called tomorrow?
4. Which are closest to revenue?

Next Actions:

- ☐ Send quotes to [names]
 - ☐ Follow up with [names]
 - ☐ Call back [names]
-

QUICK REFERENCE

Pricing (Do Not Promise Outside These):

- Standard delivery: \$45/delivery
- STAT delivery: \$85/delivery
- Monthly recurring routes: Starting \$1,200/month

Qualification Score:

- 5 = Clear pain + decision maker + near-term purchase
- 4 = Clear pain + decision maker
- 3 = Clear need + decision maker
- 2 = Possible need
- 1 = Weak signal
- 0 = No fit

Revenue Path (Each Interested Lab):

1. Send customized quote (24 hrs)
2. Follow-up call (2-3 days)
3. Pilot agreement (1 month @ \$1K/month)
4. Full contract (3 months @ \$3.5K/month average)

Success Formula: Calls Made → Interested Labs → Quotes Sent → Pilots Signed → Recurring Revenue

Your 4-Day Target:

- 30 calls total
- 6-9 interested
- 3-5 pilot agreements
- \$3-5K immediate revenue
- \$10-15K recurring pipeline (90-day)

Go crush it tomorrow. 📞💪
