

IZA OS Sector Playbook: Technology

System specifications, automated agent workforce, and capability mappings.

1. Automated Agent Workforce

Role / Profile	Assigned Agent Instance
CEO	Tech CEO Agent
Architect	Infrastructure Agent
Developer	Codebuilder Agent

2. Required Sector Capabilities & Code Blueprints

Capability	Category	Description	Reference Repositories
DEVTOOLS	technology	Codebase compiler, parser, Linter, and builder gates.	gitnexus-cli, code-graph-scanner, ruff-linter
MCP	system		
DATABASE	system		
SECURITY	system		
RAG	llm	Vector search, knowledge base recall, and embeddings.	llmaindex, langchain-rag, langfuse-rag-eval

3. OS Layer Allocations & Active Tool Runtimes

Execution Layer	Tool Name	Category	Capabilities Enabled
TOOLS	office-cli	Productivity Automation	generate_pitch_decks, compile_financial_spreadsheets, create_business_proposals
EXECUTION	cube-sandbox	Sandbox / Code Execution	safe_python_evaluation, local_repository_testing, automated_script_verification
RESEARCH	system-prompts-leaks	OSINT / Prompt Datasets	prompt_structure_analysis, system_instructions_benchmark
SECURITY	orca	Vulnerability Scanning	docker_image_vulnerability_scan, dependency_safety_check
TOOLS	astryx	Custom Automation Core	dynamic_script_execution
INGESTION	stirling-pdf	Document Processing	pdf_ocr_text_extraction, split_merge_compress_documents
CODE_INTELLIGENCE	gitnexus-cli	Code Graph Intelligence	index_codebase_call_graphs, detect_duplicate_implementations, codebase_impact_analysis
INFRASTRUCTURE	render-cli	Cloud Deployment	deploy_docker_containers, manage_static_sites

AUTOMATION	n8n-docker	Self-Hosted Workflows	orchestrate_local_workflows, execute_agent_triggers
------------	------------	-----------------------	---

4. Enterprise Competitor & System Equivalents

Enterprise Competitor	System Description	IZA OS Mapped Equivalents
Pinecone / OpenAI RAG	Qdrant vector indexes + Neo4j Cypher capability joins	Active & Configured
GitHub Copilot / Vibe	gitnexus-cli code graphs + MCP server runtime proxy gateways	Active & Configured
