1 · Entity & Trust Structure

Ownership flows top-down: the trust holds the holding company, which owns the operating LLC, which runs the ventures.

Lvl	Entity	Type	Role	Status
1	The Johns Family Trust	Trust (asset protection / estate layer)	Holds ownership interest in the holding company; shields assets, defines succession.	Planned
2	Worldwidebro Holdings	Holding company (brand / parent)	Parent brand. Owns operating entities and IP. Rebrand target once revenue validates.	Operating as brand
3	Winners Circle WC LLC	Operating LLC (bootstrap entity in use now)	Active legal entity. Contracts, banking, payroll, and venture operations run through this.	Active
4	18 Operating Companies (OPCOs)	Sector holding shells under the LLC	Group ventures by sector for P&L;, reporting, and OPCO-President accountability per the Governance Charter.	Scaffolded — 5 OPCOs unassigned, 3 sectors unmapped (see OPCO Layer audit)
5	712 Ventures	Operating ventures across 18 sectors	Revenue-generating units organized by sector, OPCO, and capital layer.	Mixed (planned / development / validation / active)

Ownership chain: The Johns Family Trust → Worldwidebro Holdings → Winners Circle WC LLC → 18 Operating Companies (OPCOs) → 712 Ventures

5 · Repository Alignment

Live pull from REPOSITORY-REGISTRY.json (generated 2026-07-08). This is the honest state, not an aspirational one.

• Only 0.0% of repos carry a related_ventures link — the repo↔venture join is not yet reliable (known capability-vocabulary mismatch). Treat the table below as portfolio inventory, not a per-venture build map.
