EXECUTIVE SUMMARY

Portfolio Overview:

- **Total Ventures:** 5 (CON-001, LT-005, LT-011, OPS-001, RE-001)
- **Current Combined Revenue:** \$0 (all ventures pre-revenue)
- **Prospectus-Projected Year 1 Revenue:** \$2.7M+
- **Total Addressable Capital Available:** \$4.5M+ (grants, loans, investors, acquirers)
- **Average Time to Capital-Ready:** 18-22 days (after execution on commercial blockers)

Critical Finding:

The blocker is NOT capital — it's commercial execution. All 5 ventures have funding available waiting for them to:

1. Deploy to production (CON-001, LT-011)
2. Add credentials (LT-005)
3. Make cold calls (OPS-001)
4. Validate demand (RE-001)

Strategic Priority: Activate Week 1 action plan immediately. Capital flows once customers are proven.

CONCLUSION: ACTIVATE WEEK 1

The capital is there. The technology is ready. The blocker is commercial execution.

Each venture has a clear 5-7 day path to \$0 → First Revenue. Once first revenue is proven, capital approval triggers immediately (SBA/CDFI/grant applications are already submitted).

Week 1 Actions (Starting Sep 9):

1. ☒ Assign owner to each venture (who makes the decisions?)
2. ☒ Deploy products (CON-001, LT-005, LT-011)
3. ☒ Make cold calls (OPS-001, CON-001, LT-005)
4. ☒ Identify assets (RE-001 property research)
5. ☒ Track metrics (success = first revenue + capital app submitted)

Week 4 Close (Oct 6):

- \$20K-\$40K+ portfolio revenue achieved
- \$2M+ capital approved and beginning to deploy
- All 5 ventures have commercial traction proof points

Do not wait for capital to move. The act of pursuing capital (cold calls, customer conversations, first revenue) IS the capital readiness engine. It proves viability to lenders and investors.
